

HOW TO BE A MORE EFFECTIVE CHEMICAL HYGIENE OFFICER

**James A. Kaufman, Ph.D.
Laboratory Safety Institute**

On Monday, October 5, 2009 important issues will be covered for Chemical Hygiene Officers: the role of the CHO, OSHA Lab Standard, lab hazards, chemical hygiene plan development and implementation, other lab regulations, beyond the lab standard, resources, and sample exam. This is the RJG Associates prep course for taking the NRCC CCHO Certification exam.

Dr. Kaufman is the director of the Laboratory Safety Institute. He has been sharing ideas about improving lab safety programs for more than 30 years. More than 60,000 scientists and science educators have attended his seminars and short courses. He is the author/narrator of the American Chemical Society audio course on lab safety and the LSI Two-day Lab Safety Video Short Course. For more information call 508-647-1900 or email Ana Adams ... adams@LabSafetyInstitute.org.
